

SCOTT O'NEILL MEMORIAL PROJECT
BOULDERING WALL
RECIPIENT: YMCA Camp Kitaki

Camp Kitaki challenges campers to grow through the use of our high ropes course. Providing a safe way for campers to experience a significant physical and emotional problem, and ultimately meet their goals, has a huge impact on a positive self esteem and self concept. However there are many steps of positive growth that could be achieved through a more accessible climbing element.

GOAL: To create a bouldering structure allowing camp staff to teach campers proper climbing technique at a low height. This would create more intermediary steps in the progression of challenge activities at camp, and would allow for greater success on the Tango Tower, our 55' climbing tower.

LOCATION | Louisville, Ne
SUMMER CAMPERS | 2,500 Annually
ANNUAL VISITATION | Approx. 10,000

YMCA Camp Kitaki's purpose is to build strong kids and adults through programs and services that develop a positive identity, relationships, values and skills in a unique natural setting.

FOR ALL: Camp Kitaki works with partner groups to provide summer camp experiences for kids who have asthma, heart disease, arthritis, learning disabilities, or who are deaf or hard of hearing.

ANNUAL CAMPAIGN: Through our Campaign, we work to ensure that finances are not a barrier to a deserving child experiencing a week of summer camp. Kitaki is for all.
